EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John P. Wagner Jr. on 21 November 2006.

The application has been amended as follows:

Claim 8

A computer system comprising:

a memory unit; and

a processor for executing:

a compiler that has a variable identifier configured for identifying variables that are candidates for reordering and a data collector configured for collecting data for determining a potential layout for the candidate variables;

a reordering categorized candidate variable linker that has a potential layout determiner and a reordering categorized candidate variable component, wherein said variable reordering component is configured to automatically reorder a set of candidate variables based, at least in part, on the

data for determining a potential layout of the candidate variables, wherein the data is used to partition the candidate variables into categories and enables reordering the candidate variables within their respective categories.

Claim 9

The computer system of Claim 8, the computer system further comprising:

~~a memory unit; and~~

[[a]] the processor coupled to the memory unit, the processor for executing a method for automatically reordering variables, the method comprising:

identifying, at the variable identifier, the set of candidate variables for reordering, wherein the candidate variables are associated with one or more source code files that are being compiled;

collecting, at the data collector, data for determining a potential layout for the candidate variables; and

determining, at the potential layout determiner, the potential layout based, at least in part, on the data.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest "identifying a set of variables that are candidates for reordering" as a part of compilation and "reordering the variables" based on categories during linking, as recited in independent claims 1 and 16.

The prior art of record, **Yui** (USPN 6,134,708), disclosed the claims as previously indicated. However, **Yui** failed to disclose the independent claims as currently recited, including reordering within categories.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
